## February Birthdays

In astrology, those born between February 1–19 are Water Bearers of Aquarius. Water Bearers are deep-thinking intellectuals, unafraid of exploring outlandish ideas. Their strong sense of community makes them good friends and valuable team members. Those born from February 19–28 are the slippery Fish of Pisces. Selfless Pisces are very wise and empathetic, making them always willing to help others. These deep emotions also make Pisces talented artists and good friends.

### **Drawing the Short Straw**

February 22 is Skip the Straw Day. Banning straws has certainly been a hot topic. More and more companies and communities are outright banning these seemingly harmless modern conveniences. This is because Americans, on average, use one million plastic straws each day, and many of those plastic bits are ending up in landfills and our oceans. For those who still want straws or need them for medical reasons, some companies now provide customers with biodegradable or compostable straws, including paper straws. People used to sip drinks through long hollow reeds of ryegrass. That all changed in 1888 when inventor Marvin Stone patented a spiral winding process for paper and created the first paper straw. His straws were far superior to ryegrass straws, for they did not impart a grassy taste to the beverage. So it seems that we have come full circle, back to Stone's original invention. But will banning plastic straws actually save the environment? Not entirely. Plastic straws are just a tiny percentage of plastic pollution. But the anti-straw movement might raise awareness about the harms of plastic to our planet.
